

Orbital Data Infrastructure

Token: **\$SPORB** · Chain: **Solana** · Supply: **100B** · sporbs.xyz

// THE VISION

The most valuable infrastructure company of this decade will sit at the **intersection of three megatrends**.

DePIN

Decentralized physical infrastructure — token-incentivized node networks that reward participants.

AI

Real-time signal processing, predictive models, and autonomous trading engines at the edge.

Web3

Tokenized infrastructure, DAO governance, and programmable value transfer.

SPORB Protocol builds the decentralized data infrastructure layer where these three converge. Starting with a live **Signal Engine** (gold market data subscription, generating real USDC revenue) and expanding into a **DePIN node network** for edge compute.

// THE PRODUCT

LAYER	WHAT	STATUS
Signal Engine	Gold market AI signal subscription — real USDC revenue	✓ Live
DePIN Nodes	Decentralized edge compute network — incentivized hardware	Architecture
Data Relay	Token-gated access to aggregated market & infrastructure data	R&D
Token	\$SPORB — company equity representation	✓ Deployed

Revenue model: Services charge **USDC**. Company profits buy back \$SPORB from market.

// TOKEN UTILITY

✓ Equity representation	\$SPORB is a company token, not a meme or payment gimmick
✓ Buyback engine	Real service revenue → market buybacks → value accrual
✓ Governance	DAO for protocol upgrades and fund allocation
✓ Node incentives	DePIN node operators earn \$SPORB for contributing compute
✗ No complex burn	Simple, clean tokenomics
✗ No double-token	Single \$SPORB until aCREDIT in Phase 2

// TOKENOMICS

Total Supply: 100,000,000,000 (100B) \$SPORB

ALLOCATION	%	AMOUNT	VESTING
Ecosystem Fund	30%	30B	DAO-governed, 10yr
Public Sale	15%	15B	5% at TGE, 3mo linear
Strategic Investors	10%	10B	6mo cliff, 24mo linear
Team	10%	10B	12mo cliff, 48mo linear
Community Rewards	10%	10B	5yr mining
Node Mining Pool	10%	10B	DePIN node rewards
Liquidity	5%	5B	100% at TGE
Advisors & Partners	5%	5B	6mo cliff, 24mo linear
DAO Treasury	5%	5B	DAO governance

// TRACK RECORD

MILESTONE	STATUS
Token deployed on Solana mainnet	✓ Live
Website & domain (sporb.xyz)	✓ Live, SSL

MILESTONE

STATUS

Early Access whitelist	✔ Open
Signal Engine (gold market data)	✔ Live, generating revenue
Metadata updated (SPORB Protocol)	✔ Done
Liquidity pool	🕒 Launch w/ services

// COMPETITIVE MOAT

FACTOR	SPORB	TYPICAL INFRASTRUCTURE TOKEN
Real service revenue	✔ USDC charges, buyback model	✗ Hype-only
Team token vesting	✔ 48mo with 12mo cliff	✗ Often 0 cliff
Supply control	✔ Creator holds 100%, responsible release	✗ Dump risk
Live revenue product	✔ Signal Engine generating now	✗ Pre-revenue
Dual-token avoidance	✔ Single \$SPORB until Phase 2	✗ Overcomplicated
Stealth approach	✔ Building before marketing	✗ Overpromise

// ROADMAP

Phase 1 — Foundation 0-12 months

- ✔ Token deploy & website
- ✔ Early access whitelist
- ✔ Signal Engine live (gold market data subscription)
- 🔄 Trading bot profitability → seed capital
- 📅 17 DePIN node hardware design & prototype
- 📅 17 Strategic R&D grant applications

Phase 2 — Service Launch 1-3 years

- 📅 17 DePIN node network launch (edge compute)
- 📅 17 Signal Engine expanded to multi-market
- 📅 17 Token liquidity pool with utility floor

 aCREDIT stable payment token (Phase 2)

 Enterprise data subscription API

Phase 3 — Scale

3-7 years

 Distributed node network (edge computing cluster)

 Infrastructure-as-a-service for enterprise

 Global node partner program

Phase 4 — Autonomous

7-10 years

 Full decentralized compute network

 DAO-managed infrastructure fund

Investment Opportunity

SEEKING

Strategic investors & grant funding

USE OF FUNDS

Node R&D, AI model training, infrastructure development

STAGE

Pre-revenue, pre-seed

STRUCTURE

Token allocation + future equity (company planned)
